Welcome

As the world accelerates its transition to clean energy, demand for lithium, nickel, copper, cobalt, and other critical minerals is soaring, with supply challenges on the horizon. Gold, an enduring commodity, will also play a pivotal role in enabling this shift.

The future of these resources hinges on capital investment, technological innovation, and government collaboration. Hosted in Singapore - Asia's financial hub, this conference connects global capital, upstream and downstream players, technology innovators, and investors seeking strategic opportunities in critical minerals and clean energy.

Immerse yourself in 2.5 days of expert-led presentations and five in-depth panel discussions exploring the latest developments in critical minerals.

Engage in exclusive networking opportunities and personalised 1-on-1 meetings designed to foster meaningful connections.

Beyond the conference, experience the best of Singapore with its world-class cuisine and a vibrant setting that enhances high-value business interactions.

Join us and be part of shaping the future of commodities, investment and sustainability!

GLORIA ZHANG
Founder of Resource Connect Asia
